## D365 Developer

[Apply Now](#)

Company: solera

Location: Mexico City

Category: computer-and-mathematical

### The Role

We are looking for an innovative **D365 F&O Developer** to grow and sustain our new D365 F&O global implementation within the Global Financial Systems department. This is a fully remote opportunity for the Central U.S. Time zone.

### What You'll Do

Leads and/or participate in project teams for on-going global adoption of D365 F&O.

Gathers information from user departments to determine how to best support the needs of end users.

Lead meetings with user groups, super users, process experts, functional leaders frequently to discuss issues/ideas and changes needed.

Support D365 F&O including incident management, problem management, patch analysis, root cause analysis, automations, and handling high severity issues within SLA.

Analyze the business requirements of all internal departments to standardize/improve business practices, processes, and procedures using the ERP system.

Responsible for proactive action regarding updates, including researching known issues, testing key processes, and educating business SMEs/BPOs on existing or new ERP functionality.

Work with management and business users to identify report gaps, design report specifications, and test developed reports.

Identify opportunities for improvements and enhancements to maximize the use of D365 F&O throughout the organization.

Leads internal process changes and driving continuous improvement while providing cross-

functional support as necessary to other departments.

Work with DBAs, systems architects, production support, technical and business staff to perform troubleshooting activities, isolation and triage activities and ultimate root cause analysis.

Prepare Knowledge documentation. Develop system/module process flows, configuration, requirements, functional, technical & architectural design documents.

### **What You'll Bring**

Bachelor's degree in business or finance/operations or IT related field.

Experience, specifically with Dynamics 365 Finance and Operations modules, Procurement, Accounts Payable, GL, Fixed Assets, Azure, SQL Server, Power BI, and SSRS development experience: **5 years (Required)**

Experience with integration patterns and technologies, such as Data Entities, OData, API integration, and Microsoft Azure integration services: **(Required)**

Experience with setting up Power Automate, MS Flows, Logic Apps: **5 years (Preferred)**

Experience in developing and maintaining SOAP and REST APIs to integrate with 3rd party SAS applications: **5 years (Preferred)**

Experience with maintaining custom code in Azure DevOps: **5 years (Preferred)**

Experience in enhancing Azure BOT framework to automate business processes: **5 years (Preferred)**

Power BI: **5 years (Preferred)**

SQL: **5 years (Preferred)**

SSRS: **5 years (Preferred)**

X++: **5 years (Preferred)**

MS Dynamics 365 Developer Certification: **(Preferred)**

Functional knowledge of Finance modules AR, AP, GL, FA, Vertex, Sales Force is a plus.

Demonstrated ability to:

Must be able to work U.S. Central time zone.

Team player with excellent communication and moderation skills and with a focus on the big picture and overall success of the customers, the team, and Solera.

Ability to analyze business and technical problems, and to find effective solutions for them.

Ability to work structured, systematically, and independently.

Passion for and commitment to quality.

Ability to work in a fast-paced team oriented environment, where change is constant and

needs to be managed.

Must be performance driven, detailed, and results oriented.

Willing to work flexible hours if needed.

Clear written and verbal communication skills in English.

Be accountable, trustworthy, transparent, and dependable.

Have a high level of emotional intelligence, self-regulation, and self-control to adapt to ensure success even in stressful or difficult situations.
