

## Java Backend Engineer

[Apply Now](#)

Company: Dew software

Location: Mexico

Category: computer-and-mathematical

Dew Software's IT services include architecture, implementation, software development, web application development, testing of large-scale enterprise applications, and mobility services

### The Role

#### Your responsibilities will include:

Writing well-designed, testable and efficient code.

Gathering and evaluating user feedback.

Working as a part of a dynamic team to deliver winning products.

Providing code documentation and other inputs to technical documents.

Supporting continuous improvement by investigating alternatives and new technologies and presenting these for architectural review.

Troubleshooting and debugging to optimise performance.

### Ideal Profile

5+ years of experience in the fields of software engineering (backend)

3+ years of experience using cloud-based platforms such as GCP, AWS, Azure, or similar technologies

Proficient in one or more compiled languages, preferably Java, Golang

Track record of leading and delivering large-scale, cross-team, cross-functional projects, enjoy collaborating on an agile development team and have empathy for teammates and customers.

Experience with designing and implementing interfaces and infrastructure for large-scale systems and RESTful APIs

Strong experience with Springboot, Microservices

Excellent communication and collaboration skills, and experience working with a remote, global team.

Have a passion for building large-scale distributed systems and are comfortable writing maintainable, extensible, scalable, and high-performance code.

Have a startup personality and enjoy working as part of a team: smart, ethical, friendly, hard-working, and productive.

You love mentoring junior engineers, leading end-to-end development and release of an application or service, and deploying software that conforms to best practices.

Comfortable evaluating and adapting to the latest tools and technologies.

Bachelor or Master of Science in Computer Science, Information Systems, or related degree

### **What's on Offer?**

Join a well known brand within IT Services

Opportunity to make a positive impact
