Company: Stellantis

Location: Toluca

Category: other-general

Job Description

- *Propulsion System (PRS) on site representative in Saltillo Plant, coordinating PRS on site resources on BEV and ICE programs
- *Support the PRS Sub-System Technical Manager (SSTM) on onsite coordination of all PRS representatives
- *Report to PRS and vehicle project organization
- *Ensure that assembly operations respect adapted powertrain core team standards
- *Contribute to resolution of technical facts identified during assembly
- *Contribute to the identification of a solution fit for serial production and if needed a temporary one
- *Pilot conformity review of vehicles of vehicles leaving the plant
- *Specify, test, validate Propulsion Systems components for assigned vehicles families; analyze and solve parts-related failures; propose, validate and obtain cost reductions on these parts.
- *Process documentation on changes or modifications to components from assigned vehicle families (Change Notices).
- *Request and authorize required testing to systems, parts and components for assigned vehicle families to validate compliance on Design Requirements (Design Verification Plan & Report, DVP&R).
- *Create and evaluate requests for component's functional testing in assembly plants before implementation into normal production. (Production Evaluation Request).

- *Release temporary approvals for part validation on assigned vehicle families. (Interim Approval Authorization).
- *Analyze and solve functional and durability failures on components in assigned vehicle families. (GIMS).
- *Support to Assembly Plants on the usage and application of specifications and design changes according to Engineering Changes.
- *Standardize and benchmark components (performance, weight, cost efficiency).
- *Create FMEA documents.
- *Approve or reject documents for Temporary Substitution on components in Assembly Plant.
- *Request prototype parts manufacturing to solve warranty issues.
- *Create cost reductions proposals.
- *Obtainment of product changes information, implementation dates, service and/or recall technical bulletins, Product Engineering standards, bill of material and Engineering graphs.
- *Verify product manufacturing process before mass production release.
- *Request and obtainment of concurrencies on: validations, temporary and definitive product deviations
- *Coordinate DFMEAs and PFMEAs with suppliers.
- *Support Pilot and Pre-series events in Assembly Plants.

DESIGN EXPERIENCE IN THE FOLLOWING COMPONENTS:

- *Electronic modules.
- *Battery packs and electrification components
- *Internal Combustion Engine / Electric Motor / Power Electronics accessories components.
- *Internal and surrounding components from Internal Combustion Engine / Electric Motor / Power Electronics.

Requirements

QUALIFICATIONS

- *Bachelor's Degree required in Engineering (Mechanical, Mechatronics, Automotive, Electric, Electro-mechanical, etc).
- *Previous experience: Preferably 5 years or more in automotive industry as Product Engineer or product development-related position.

PREFERRED QUALIFICATIONS:

- *Solid knowledge in automotive vehicles and systems, assembly and manufacturing, part

validations and automotive systems.

*Knowledge in statistics; testing, validation and failure solving in Automotive Industry or similar.

*Good skills to communicate and present ideas, as well as experience in basic software suites (Google Suite, Microsoft Word, Excel, PowerPoint, Project, Minitab,

*Computer-design software skill in NX and/or CATIA.

*Proactive, analytical, inquiring attitude; synthesis capability, team player.

*Disciplined and planning capacity.

OPTIONAL:

*DFSS Green Belt/Black Belt certified

*Reactive Green/Black Belt certified

LANGUAGES:

*English
