Job Description

Job Description:

This position of Lab Manager is responsible for leading, managing and controlling all Testing Laboratory activities with the objective to validate automotive electromechanical and electronic products.

Job Responsibilities:

Leading Testing Laboratory to implement all of CV/DV/PV (Concept Validation, Design Validation and Product Validation) and other tests to support product development and validation.

Support customer RFQs.

Managing and supervising lab in line with BCS global test standards and processes.

Directing, coaching and training lab personnel for product tests in product development period and other validation activities.

Ensuring that the Testing Laboratory meets all project/customer key milestones within the product development period.

Ensuring all of CV/DV/PV tests requirements are mature through design reviews, DFMEA review, Gate review and other BCS design procedures.

Leading VAVE activities of lab.

Coordinating new products/projects activities with TPL, PM and CPA team.

Responsible for employee' performance reviews, remuneration, and any changes in job level or scope.

Report test and team status to Sr. Engineering Manager Queretaro Tech Center and Engineering Director in regular base.

Ensuring design milestones/deliverables and a safe launch are met.
