Company: Tala

Location: Mexico City

Category: computer-and-mathematical

About Tala Tala is a global technology company building the world's most accessible financial services. With more than \$350 million raised from visionary investors, we are serving millions of customers around the world who have been overlooked by traditional financial institutions – and our plan is to serve millions more, and have been named by the Fortune Impact 20 list, CNBC's Disruptor 50, and Forbes' Fintech 50 list for five years running. We are expanding across product offerings, countries and crypto and are looking for people who have an entrepreneurial spirit and are passionate about the mission. By creating a unique platform that enables lending and other financial services around the globe, people in emerging markets are able to start and expand small businesses, manage day-to-day needs, and pursue their financial goals with confidence. Currently, more than 7 million people across Kenya, the Philippines, Mexico, and India have used Tala products. Due to our global team, we have a remote-first approach, and also have offices in Santa Monica, CA (HQ); Nairobi, Kenya; Mexico City, Mexico; Manila, the Philippines; and Bangalore, India. Most Talazens join us because they connect with our mission of enabling financial agency for underbanked people around the world. If you are energized by the impact you can make at Tala, we'd love to hear from you! **The Role** We are looking for a Senior Data Scientist interested in solving one of the world's biggest problems: financial inclusion. As a Data Scientist, you will lead data science initiatives that drive improvements in customer experience, operational efficiency, and recovery. You will own the modeling cycle through scoping, development, deployment after sale, and monitoring, with a keen focus on business outcomes and stakeholder management.

What You'll Do

Embed with business stakeholders to identify, test, and implement data science solutions that drive business and customer success. Develop a roadmap in collaboration with stakeholders to organize and prioritize initiatives.

Own full-cycle of machine learning products from ideation and training through deployment into our production environment – including real-time inference – and after-sale service. Obsess over machine learning products, iterating rapidly if necessary.

Become a multiplier for the data science team by sharing work, providing mentorship to junior team members, providing technical feedback, and developing work into shared team tooling.

Be a thought partner for the business, leverage data insights and strong communication skills to influence company strategy.

What You'll Need

4+ years of experience in a data science role or equivalent position.

2+ years in a senior position leading the execution of end-to-end machine learning solutions for business stakeholders.

Fluency with Python and packages related to machine learning.

Comfort with SQL.

Experience with the full modeling cycle, from scoping and development through deployment, after-sale, and monitoring. Demonstrated business value in previous roles.
