

Software Development Engineer, Concept to Launch

[Apply Now](#)

Company: Servicios Comerciales Amazon Mexico S. de R.L. de C.V. - D44

Location: Zapopan

Category: computer-and-mathematical

Amazon Lab126 is an inventive research and development company that designs and engineers groundbreaking devices used by Amazon and by our customers. Lab126 began in 2004 as a subsidiary of Amazon.com, Inc., originally creating the best-selling Kindle family of products. Since then, we have created new device categories like Fire tablets, Fire TV, and Amazon Echo. What will you help us create?

The Concept to Launch (C2L) team's mission is to make it incredibly simple to create, build and launch innovative, new-to-world devices in record time. We build technology to automate and scale the end-to-end product development process for all Amazon devices, from your favorite Kindle e-reader to the next generation of Alexa-enabled products. As part of our team, you'll design and build software that powers the innovation flywheel for Amazon Devices, transforming new Think Big ideas into the products our customers know and love—at Amazon speed and scale!

Key job responsibilities

As a Software Development Engineer on the team, you will be responsible for:

- Designing, implementing and launching high-quality software systems to solve complex problems with big impact
- Working across a broad range of AWS technologies to build full-stack web applications, distributed systems software and automation workflows

- Collaborating with a diverse range of cross-functional roles, including engineering, product, customers and business stakeholders across the company
- Promoting a culture of engineering excellence by establishing best practices and technical standards across the organization
- Consulting with engineers from across the organization on architecture and design of new systems to solve some of our hardest engineering problems

We are open to hiring candidates to work out of one of the following locations:

Zapopan, MEX

BASIC QUALIFICATIONS

- 3+ years of non-internship professional software development experience
- 2+ years of non-internship design or architecture (design patterns, reliability and scaling) of new and existing systems experience
- Experience programming with at least one modern language such as Java, C++, or C# including object-oriented design
- Advanced written and spoken English level

PREFERRED QUALIFICATIONS

- 3+ years of full software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations experience
- Bachelor's degree in computer science or equivalent
