Get started on an exciting career at Element!

Element employees make a difference in the lives of others every day. We are re-defining the fleet management industry to be people first, then business – delivering on our promise of a superior client experience. This takes hard work and innovation, and we need more like-minded people on our team.

A solutions architect is responsible for creating a comprehensive architecture for a software solution and providing strategic direction throughout the development process.

The responsibilities of a solutions architect involve understanding potentially complex problems and finding all the possible solutions – accurately defining the issue and the requirement.

This person needs to ensure that the new solution fits into the existing enterprise architecture from technical, business, user, and other perspectives.

They cooperate with all the teams involved in the development process and need to know how every product and service works in architecture. An IT solution architect needs all this knowledge to oversee a successful delivery of a quality end product to its end users.

Another responsibility of a solutions architect is to invest researching and understanding new technologies and solutions.
