Solution Architect Sr

Apply Now

Company: CHUBB

Location: Mexico

Category: computer-and-mathematical

This position's location is in San Pedro Garza Garcia, Nuevo Leon, Mexico, will be worked a Hybrid Work From Home scheme (3 days at the office).

ROLE SUMMARY

Chubb is looking for an IT Leader with Solution Architecture experience to join our regional IT Architecture team as the lead architect for our modern Small & Medium-Sized Enterprises (SMEs) application portfolio, leading the design activities within conceptualization and initialization phases and supporting project execution. The individual will be accountable for the solution architecture design, application roadmap and cloud migration / modernization for the designated portfolio and will act as a single point of contact between the local leadership and regional / global architecture as required. This person will be accountable for e2e solution design, managing demand / priorities of the architecture function locally, representing the country in regional / global forums. The individual will report to the Regional AVP in charge of Regional Applications and will be embedded within the regional delivery team.

This person should have a passion to understand and apply architectural design patterns for modern environments, while learning how to manage and prioritize technology decisions over a portfolio of applications and drive modernization initiatives. The candidate will also support improve adoption of standard EA Frameworks and best practices such as Domain Driven Design and define KPIs for the programs under his / her responsibility. The individual will be accountable for the completion and validation of solution design artifacts.

REQUIREMENTS

Experience in role: 4+ years experience in activities such as:

Define architecture frameworks, reference architectures and specific solution architectures

Research on alternatives scenarios to design high level architecture solutions

Solution design and documentation

Support detailed analysis activities on systems of records, digital technologies, cloud adoption and DevSecOps implementation.

Enhance KPIs and reporting methods for Enterprise Architecture

Work closely with operation and business teams to help understand business needs, prioritize and transforming them into IT deliverables

TECHNICAL COMPETENCES

Proficiency with modern tech stack Java Spring Boot / Quarkus

Solid understanding of Software Engineering patterns and application in refactoring scenarios

Experience in enterprise / legacy middleware and B2B integration patterns (batch and online)

Experience in cloud environments with PaaS solutions (Azure preferred)

High level understanding of architecture modeling / concepts

Experience evaluating / comparing technologies / products using both functional and non-functional requirements

Working knowledge of Kubernetes and other containerization solutions

Highly organized, possessing strong analytical abilities

Excellent written/verbal skills

Working knowledge of Excel, PowerPoint and Word required.

Ability to interact well with various levels of the organization

Ability to quickly learn project processes and their incorporation into the tools utilized.

Orientation toward details
