Company: Avery Dennison Smartrac

Location: Santa Rosa Jáuregui

Category: computer-and-mathematical

Company Description

Avery Dennison Corporation (NYSE: AVY) is a global materials science company specializing in the design and manufacture of a wide variety of labeling and functional materials. The company's products and solutions, which are used in nearly every major industry, include pressure-sensitive materials for labels and graphic applications; tapes and other bonding solutions for industrial, medical, and retail applications; tags, labels and embellishments for apparel; and radio frequency identification (RFID) solutions serving retail apparel and other markets. The company employs approximately 36,000 employees in more than 50 countries. Reported sales in 2021 were \$ billion. Learn more at .

Job Description

What we can offer you! - Your Role:

In this role you will be responsible for performing and documenting a variety of tests, to evaluate the performance and reliability of final RFID products as well as early prototypes. As a Test Engineer you will be working closely with the production area, product designers, quality engineers & Product Management team to design test setups, build prototypes and analyze test results to create the best performing RFID products on the market. In addition, you have a major role in developing the test methods and equipment to support our continuous efforts to increase efficiency and quality of lab testing.

Activities may include, but are not limited to:

Planning, executing and reporting laboratory tests for production validation and prototypes, pilot runs and product evaluation purposes

Designing and improving wireless RFID testing setups

Learning to use lab equipment efficiently and effectively, maintaining laboratory systems and devices

Testing RFID tags and characterizing RFID ICs

Hands-on sample machine preparation.

Performing basic calculations on test results and creating demanded documentation

Maintaining and calibrating standard lab equipment

Supporting a positive culture of safety to ensure the laboratory meets all health and safety requirements

Carrying out product failure analysis and providing clear root cause investigation

Qualifications

What we expect from you! - Your Expertise:

Bachelor's or Master's degree in Electrical, Mechatronics or Electrical-Mechanical Engineering, RF Electronics, IT Systems or related field.

2-3 years of job experience as control engineer or similar position

Being familiar with RF testing technologies, ethernet network and measurement systems, such as VNA and Spectrum Analyzer.

Work experience in Network, Electronics or RF Electronics Laboratory, preferably in manufacturing industry

Technical interest in machines and equipment used in laboratories.

Ability to write prompt and readable testing reports

Good written and spoken English

Ability to rapidly adapt and respond to changes in environment and priorities

Experience working with wireless technologies or products is highly appreciated but not mandatory
